**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 15, 2008 has been entered.
2. Applicant's amendment and accompanying remarks filed August 15, 2008 are acknowledged.
3. Examiner acknowledges amended claims 1 and 5.
4. Examiner acknowledges cancelled claims 3-4 and 6-8.
5. The rejection of claims 1-2, 5 and 9-10 under 35 U.S.C. 112, second paragraph is overcome by applicant's amendment.
6. The rejection of claims 1-2 and 9 under 35 U.S.C. 102(e) as being anticipated by Matsuura et al., U.S. Pre Grant Publication 2005/0064233 is overcome by applicant's amendment.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
8. Claims 1-2, 5 and 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

applicant regards as the invention. Claim 1 is rendered indefinite because B1 and B2 are defined twice and it is unclear as to which Markush group really defines what B1 and B2 are.

#### ***Allowable Subject Matter***

9. Claims 1-2, 5, and 9-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The prior art does not provide for the recited organic electroluminescent device comprising a light emitting layer sandwiched between two electrodes wherein the light emitting layer comprises a plurality of materials; a blue light emitting material represented by chemical formula 1 and a material represented by chemical formula 2. The closest prior art, Matsuura et al., U.S. Pre Grant Publication 2005/0064233, does not teach or render obvious quinoline, perylene, pyrene, naphthalene or phenanthrene as X in chemical formula 2.

#### ***Response to Arguments***

10. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
